

# User Manual

# About this manual

- This user manual is specially designed to detail the computer's functions and features.
- The user manual supplied with the computer may vary depending on the model.
- Please read this manual before using the computer to ensure safe and proper use.
- Optional items, some devices and software referred to in the user manual may not be provided or subject to upgrades. Note that the computer environment referred in the user manual may not be the same as your environment.
- Descriptions are based on the computer's default settings and Windows 8.1 operating system. Available features and additional services may vary by computer or operating system.
- This user manual describes procedures for using the touchpad and mouse. Instructions for using the touch screen are for models with the touch screen feature.
- Images and screenshots are those of the representative model of the series and may differ in appearance from the actual product.
- Content may differ from the final product and is subject to change without prior notice. For the latest version of the manual, refer to the Samsung website, [www.samsung.com](http://www.samsung.com).

## Instructional icons and expressions

**Warning:** situations that could cause injury to yourself or others

**Caution:** situations that could cause damage to the computer or other equipment

**Note:** notes, usage tips, or additional information

The order of options or menus you must select to perform a step. For example, select the **Settings** charm → **Power** (represents select the **Settings** charm and then **Power**).

**Select** Click or touch. For example, when using a mouse or touchpad, select **Settings** means click **Settings**. When using a touch screen, it means touch **Settings**.

HDMI, the HDMI logo, and the term High Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC.

As an ENERGY STAR® Partner, Samsung has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

- The ENERGY STAR Program has reduced greenhouse gas emissions and saved energy through voluntary labeling.
- Power management setting of this product have been enabled by default, and have various timing settings from 1 minute to 5 hours.
- The product can wake with a button press on the chassis from sleep mode.

## Caution for the data

Samsung Electronics shall not be liable for any data loss. Please take care to avoid losing any important data and back up your data to prevent any such data loss.

## Operating system and software support

If you change the product's factory OS (Operating System) to another OS or if you install software which is not supported by the product's original factory OS, you will not receive any technical support, product exchange or refund, and a fee will be charged when requesting a service.

Please use your computer with the original factory OS. If you install an OS other than the factory OS, data may be deleted or the computer may not start.

## Recommended screen resolutions

The recommended screen resolution for Windows is "FHD" (1,920x1,080) and for Windows 8.1 is "QHD+" (3,200x1,800).

If you set the resolution higher than the recommended value, it may result in problems with some applications, due to limitations of the operating system.

## Product capacity representation

### Storage capacity representation

The capacity of the storage device (HDD, SSD) of the manufacturer is calculated assuming that 1KB=1,000 Bytes.

However, the operating system (Windows) calculates the storage device capacity assuming that 1KB=1,024 Bytes, and therefore the capacity representation of the HDD in Windows is smaller than the actual capacity due to the difference in capacity calculation. For example, for an 80GB HDD, Windows represents the capacity as 74.5GB,  $80 \times 1,000 \times 1,000 \times 1,000 \text{ byte} / (1,024 \times 1,024 \times 1,024) \text{ byte} = 74.505\text{GB}$ .

In addition, the capacity representation in Windows may be even smaller because some programs such as Recovery may reside in a hidden area of the HDD.

### Memory capacity representation

The memory capacity reported in Windows is less than the actual capacity of memory. This is because BIOS or a video adapter uses a portion of memory or claims it for further use. For example, for 1GB(=1,024MB) memory installed, Windows may report the capacity as 1,022MB or less.

### About the chargeable USB 3.0 port

- It may take longer to charge the battery when charging a USB device.
- The charging status of the USB device is not displayed on the computer.
- This feature may not be available with some USB devices.

# Turning the computer on and off

## Turning on

- 1 Connect the **AC adapter**.

- 2 Press the **Power button** to turn the computer on.  
**Power LED** is lit while the computer is turned on.

## About Windows Activation

When you turn the computer on for the first time, the Windows activation screen appears.

Follow the activation procedures according to the instructions on the screen to use the computer.

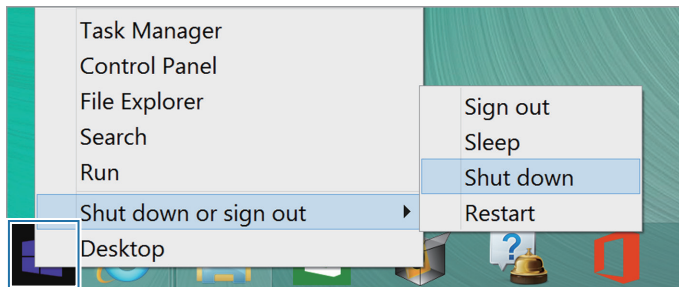

If there is no display but a message of "HDMI" on the screen after you turn on the computer, press the Source button to change the picture mode. (**monitor** mode → **PC** mode)

## Turning off

### Turning off on the desktop

- 1 To select the Start button, do one of the following:
  - **Mouse:** Right-click the Start button (⊞) at the lower-left edge of the desktop.
- 2 Select **Shut down or sign out** → **Shut down**.

- Save all the data before turning off the computer.
- Since the procedures to turn the computer off may differ depending on the installed operating system, please turn the computer off according to the procedures for the purchased operating system.

### Turning off on the Start screen

- 1 Select **Power** (⏻) at the upper-right corner of the **Start** screen.

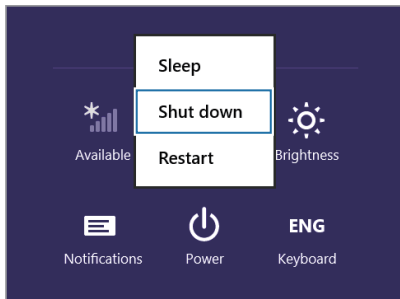

- 2 Select **Shut down**.

## Turning off on the Charms

- 1 To open the Charms, do one of the following:
  - **Touchpad/Mouse:** Move the cursor to the upper- or lower-right edge of the screen.

- 2 Select the **Settings** charm → **Power** → **Shut down**.

## Unlocking the screen

To unlock the lock screen, do one of the following:

- **Mouse:** Click the lock screen.
- **Keyboard:** Press any key.
- **Touchpad:** Tap the touchpad.

If the account has a password, enter the password to log in after unlocking the screen.

# Windows

Microsoft Windows is an operating system that is used to control a computer. For optimal use of the computer, learn how to use the operating system properly. It is best to learn how to use Windows by using **Windows Help and Support**, and **Help+Tips**.

- Images and available features may differ depending on the model and operating system.
- This manual is designed for Windows 8.1 and content may differ depending on the OS version.
- The image displayed on the desktop screen may differ between models and OS versions.

## Help

To access the help, do one of the following:

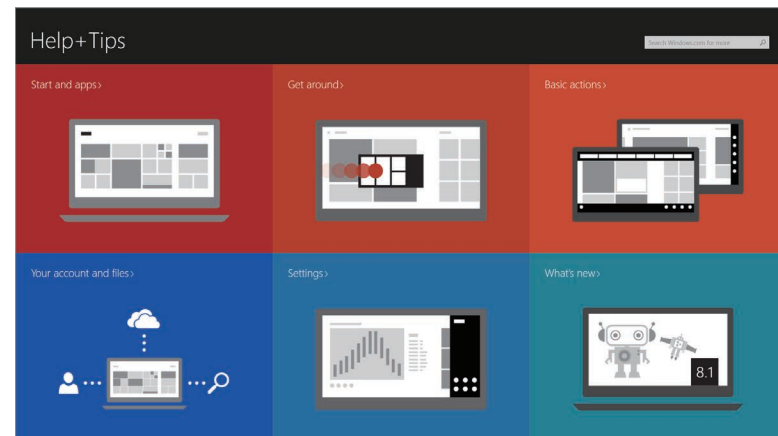

- **Keyboard:** Press the **F1** key.
- **Mouse:** Move the cursor to the upper- or lower-right edge of the screen to open the Charms and select the **Settings** charm → **Help**.

## Help+Tips

On the **Start** screen, select **Help+Tips**.

You can control Windows menus with the mouse or with gestures.

# Basics

## Using a wired keyboard/mouse (Optional)

Use the keyboard to enter characters and perform various functions.

A mouse is a device that controls the cursor or pointer on the screen.

The appearance and the color of the provided mouse may differ depending on the model.

If you move the mouse, the pointer on the screen moves in the same direction.

## Click function

Briefly press the left mouse button once.  
If you click this mouse button once, the corresponding program is selected.

## Double-click function

Quickly press the left mouse button twice.  
The corresponding program is launched.

## Right click function

If you click this mouse button once, the context-sensitive menu of the current program appears.

## Drag function

Dragging refers to clicking an item and moving the item to another position while holding the mouse button down.

Click the left mouse button over an item to be dragged and move the item to the new position while holding the mouse button down.

## Scroll function

If you turn the wheel button up or down, the screen moves up or down accordingly.

## Using a wireless keyboard/mouse (Optional)

The wireless keyboard and mouse are optional and the appearance and the color of the provided keyboard and mouse may differ depending on the model.

### Installing the wireless receiver

- 1 Open the Battery Cover at the bottom and insert the battery in the right **polarity** (+,-).

**Example) Wireless mouse**

- 2 Insert the wireless signal receiver into the **USB port** at the back of the computer.

- 3 Slide the power switch at the bottom of the mouse to the **ON** position.

**Example) Wireless mouse**

- 4 You can use the wireless keyboard and the mouse without additional settings.

- You can use the wireless keyboard and the wireless mouse within a 5m distance of the wireless signal sensor.
- The distance is subject to the surroundings and if there is interference nearby, in particular a wireless LAN AP, the distance may be decreased.

## Wireless keyboard

- 1 Locate the **battery cover** at the bottom back of the keyboard.  
Use your fingers to push the cover up.

- 2 Insert the batteries and then close the battery cover.

- Be sure to confirm that the polarities (+ / -) of the batteries are correct.
- Do not recharge the batteries (AAA type) supplied with the product.

**Windows Key**

The **Start** screen appears.

**Directional keys**

Moves the cursor up, down, left or right.

**Battery cover**

**CONNECT button**

Press the connect button to connect to the wireless signal receiver.

## Shortcut Keys

While pressing and holding the **Fn** key, press a **shortcut keys**.

Shortcut keys	Function	Description
F1 	Play the previous file	Play the media file
F2 	Play/Pause	
F3 	Stop	
F4 	Play the next file	
F5 	Search	These are Windows menu keys. Each menu item will be activated as appropriate. * This is not available on Windows 7.
F6 	Share	
F7 	Device	
F8 	Setup	

Shortcut keys	Function	Description
F9 	Mute	Toggle the sound on and off.
F10 	Volume control	Adjust the volume.
F11 		
F12 	Power saving mode	Switch to power saving mode.

The wireless keyboard automatically enters power-saving mode if there is no key input for a pre-determined period of time. Press any key to resume using the keyboard in power-saving mode.

However, a function to turn the keyboard off is not supported.

## Wireless Mouse

If you move the mouse, the pointer on the screen moves in the same direction.

## Click function

Briefly press the left mouse button once.

If you click this mouse button once, the corresponding program is selected.

## Double-click function

Quickly press the left mouse button twice. The corresponding program is launched.

## Right click function

If you click this mouse button once, the context-sensitive menu of the current program appears.

## Drag function

Dragging refers to clicking an item and moving the item to another position while holding the mouse button down.

Click the left mouse button over an item to be dragged and move the item to the new position while holding the mouse button down.

## Scroll function

If you turn the wheel button up or down, the screen moves up or down accordingly.

## If the wireless keyboard does not work

### ► Check if it is out of battery.

For the keyboard, check if the **battery low indicator**  at the top right blinks.

If the indicator blinks, you need to replace the battery.

### ► Check the status of the wireless signal receiver.

- 1 Disconnect the wireless receiver from the main body and then reconnect it.

- 2 Within 30 seconds of reconnecting the receiver, press and hold the **CONNECT** button for 1 seconds near the receiver.

- 3 Check if the device works properly.

## If the wireless mouse does not work

► When the power switch at the bottom of the mouse is in the **OFF** position, the mouse does not work.  
Turn the switch to the **ON** position.

► Check if it is out of battery.

► Check the status of the wireless signal receiver.

1 Set the power switch at the bottom of the mouse to the **OFF** position.

2 Disconnect and then reconnect the wireless signal receiver to the main body.

3 Set the power switch at the bottom of the mouse to the **ON** position.

- 4 Within 30 seconds of reconnecting the receiver, press and hold the **CONNECT** button for 1 seconds near the receiver.
- 5 Check if the device works properly.

## LCD brightness

Adjust the LCD brightness to reduce eye strain and save power.

### Controlling with Charms

Open the Charms, select the **Settings** charm → , and drag the slider.

## Changing display mode

Set the optimal conditions for the screen, based on the activity.

Some options may not be available depending on the model.

- 1 On the **Start** screen, select .
- 2 Select **Settings**.
- 3 Select **Display** → **Display Color** → an option.
  - **Adapt Display:** Optimizes the screen automatically for the currently running program.
  - **Standard:** Appropriate for normal environments and convenient for most situations.
  - **Photo Editing:** Appropriate for editing photos.
  - **Reading mode:** Appropriate for reading documents.

## Samsung Computer's Defective LCD pixel management standard

Although Samsung Electronics, Co., Ltd. observes strict quality and confidence specifications for LCD manufacturing, the company must inevitably allow a few defective cells in panels due to a technological limitation of the manufacturing process.

Therefore Samsung observes and manages the following dot principles:

- Bright dot : 2 or less
- Black dot : 4 or less
- Combination of Bright and Dark : 4 or less

## Instructions for Cleaning the LCD

Clean the LCD panel with a soft cloth lightly moistened with computer cleansing detergent moving in one direction.

Cleaning the LCD panel with excessive force can damage the LCD.

## Volume

Adjust the system volume or sound volume when playing music or video.

### Using the control button

Press the - button to control the volume.

## Controlling with Charms

Open the Charms, select the **Settings** charm → , and drag the slider.

## Dolby Digital Plus

Use **Dolby Digital Plus** to optimize your audio experience.

This feature enhances sound elements by analyzing and adjusting sound levels automatically.

This feature may not be available depending on the model and operating system.

- 1 On the desktop, open the Charms and select the **Settings** charm → **Control Panel** → **Hardware and Sound** → **Dolby Digital Plus Home Theater** .
- 2 Click  and select a play mode.  
Movie, music, game, and voice optimization modes are provided by default, and you can add custom modes.

## Using the product as a monitor (Optional)

The LCD screen of this product can be used as a monitor using the Digital Video/Audio Input Port (HDMI-IN).

Try using this product as a monitor by connecting an HDMI device such as a computer, gaming console, DVD player and so on.

## Using the product as a monitor

- 1 Connect the external device (HDMI output port) and this product (digital video/audio input port (HDMI-IN)) with the HDMI cable.
- 2 Press the Source button to switch this product to **monitor mode**.

You can only use monitor mode by connecting the Digital Video/Audio Input Port (HDMI-IN). The Digital Video/Audio Out Port (HDMI-OUT) is for output only.

- As long as the power cord is connected, you can use the LCD of the product as a monitor even when the product is off.
- Even if the product is switched to monitor mode by pressing the Source button during an operation, the operating system is not terminated. Press the Source button again to return to PC mode.
- If the product is switched to monitor mode, the audio is also switched accordingly.
- If no picture is displayed on the LCD screen when the product is switched to monitor mode, disconnect and then reconnect the HDMI port.
- To use the computer in the monitor mode after the computer enters the power saving mode or shuts down, press the LCD On/Off button.

## Returning to PC mode

To return to PC mode from monitor mode, press the Source button.

## Playing music from smartphones directly through the computer speakers (Optional)

Use Bluetooth pairing to play music from smartphones or tablets (hereinafter “smartphones”) through the computer speakers.

Pair the smartphone to the computer, and quickly access music.

- This is available only with Bluetooth-compliant smartphones.
- Keep a certain distance from the computer.
- The screen and user interface depend on the model and driver version.

## Pairing the computer to the smartphone

Pair the computer to the smartphone for the initial settings.

1

Press the **Bluetooth** button  on the computer.

The indicator blinks with a message of **Pairing** on the screen.

To regain pairing, press and hold the button for **3 seconds or more**.

2 On the smartphone, activate **Bluetooth** and select **Bluetooth Music Play** to proceed.

ex) Pairing on Samsung smartphones:

From Settings, select and activate **Bluetooth**, and then tap **Bluetooth Music Play** to proceed.

3 You will see **Connected** on the computer screen.

Pairing is complete.

Select a music file on the smartphone, and listen to the music through the computer speakers.

## Using the computer speakers

Once pairing is established, press the Bluetooth button for quick access.

- 1 Press the **Bluetooth** button  on the computer to turn on the indicator.

The computer speakers turn on with a message of **Ready** in the lower right corner.

- 2 Move the smartphone close to the computer to automatically pair the two devices.

When pairing is complete, **Connected** appears on the screen.

- 3 You can now listen to music through the computer speakers. Select a music file to play on the smartphone.

## Turning off the computer speakers

Press the **Bluetooth** button  to turn off the indicator.

A message of **Off** appears in the lower right corner.

The computer speakers are now turned off.

- If no music is output through the computer speakers, check if the smartphone is paired to the computer properly. If pairing is disconnected, refer to **Pairing the computer to the smartphone** and regain pairing.
- In case of disconnected pairing, present the smart phone close to the computer to regain pairing.
- The volume is not controlled by the volume buttons on the computer. To control the volume, adjust the volume on the smartphone.

## Using the TV (Optional)

Products embedded with a TV tuner card (Optional) can use the TV function.

After connecting to the antenna, you can watch TV by using the corresponding TV program.

You can only use the TV function when the **TV tuner card (Optional)** is installed.

## Connecting the TV Antenna

You must connect the **TV tuner card (Optional)** to the **TV antenna**. Connect the **antenna cable** to the **TV antenna input port**.

## Configuring the TV

- The screenshots and terms used in the user manual may differ from the actual ones.
- The screen and menu titles of the TV program (ATIV TV) may differ depending on the version.

- 1 Click **Start Screen** → TV programs (ATIV TV).
- 2 Click **Start** on the main screen.  
The built-in TV tuner starts scanning channels available.
- 3 When the auto scanning is complete, the default TV channel will be run.

### Resetting the channels

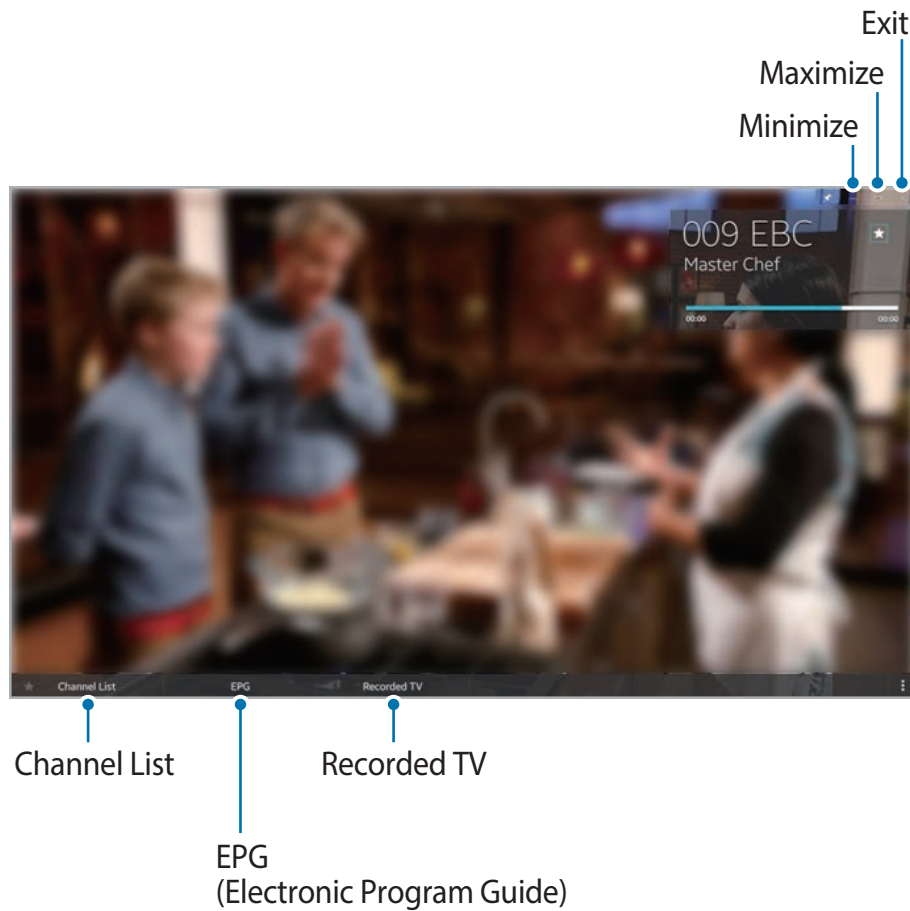

In the lower right corner of the smartphone, select **Menu** → **Settings** → **Reset TV Signal**.

The scanned channels are saved.

## Note on Configuration

- The setup procedures may differ depending on the current type of your TV service.
- The area must be set to the country of your current residence.

## TV Program Menu

Menu	Description
Channel List	Displays the list of channels available.
EPG (Electronic Program Guide)	<p>This is a TV program guide covering all digital TV channels. EPG will extract the program schedule information contained in the digital TV signal.</p> <p>However, it may differ depending on the corresponding station and the reception. Also, some functions may not be provided.</p>
Recorded TV	You can watch a recorded TV program.

## Watching TV

- 1 Start the TV program (ATIV TV).
- 2 Click Channel List to switch to the channel.

Select the asterisk ★ next to the channel title, and then click the channel list to display a list of those channels that contain the asterisk ★.

## Recording TV

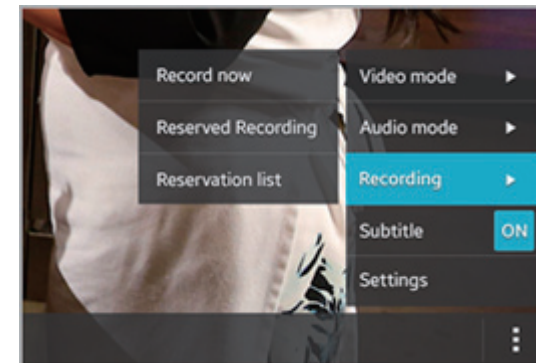

You can record a TV program on your computer.

### Recording the current program

In the bottom right corner, select **Menu** ☰ → **Record** → **Record now**.

This will start the recording.

The recording time can be adjusted using the Timer menu in the bottom right corner.

## Creating a recording schedule

1 In the bottom right corner, select **Menu**  → **Record** → **Reserved Recording**.

2 Set your program and the reservation time.

- Even when the computer is in power-saving (sleep) mode, if the recording reservation time is reached, the TV automatically wakes up from power-saving mode and performs the reserved recording.

When the computer is in hibernation mode, recording reservations will not work.

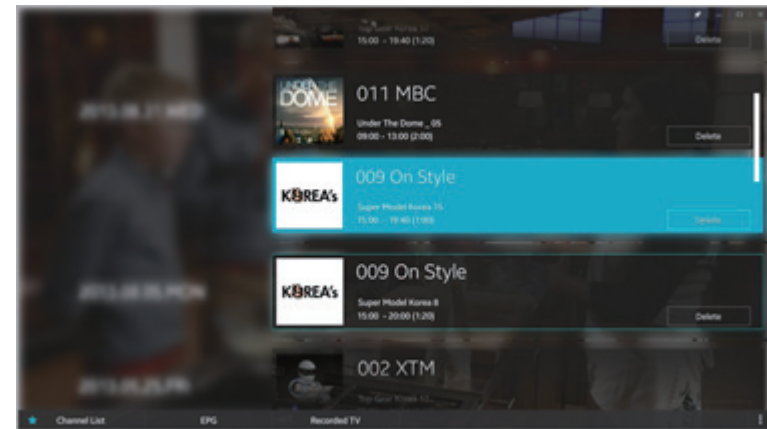

- While recording a channel, you cannot record or watch another channel.

## Playing a recorded program

Click **Recorded TV**.

The recorded programs are displayed. Select a program to watch.

You can list the recorded programs by program, channel or date.

- The recording file will be saved to **File Explorer** → **Local disk (C:)** → **User** → **User Folder** → **Video**.
- Sizes of recorded TV programs range from several gigabytes to tens of gigabytes.
- Recorded TV programs can be played only by the ATIV TV app on the computer where the recording took place.

## Using the Remote Control (Optional)

You can use the TV functions with the remote control.

You can run the **Live TV** program from the desktop.

Check the functions of each button.

- The appearance of the remote control may differ from the actual one. Some functions may not be provided depending on the system.
- Use your remote control by pointing it toward the remote control receiver.
- If the remote control does not operate at all, replace it with a new one.

## Installing the batteries

Open the cover at the bottom of the remote control and insert the batteries according to the correct polarities (+, -).

- Some buttons on the remote control may function differently depending on the operating system.
- The Search, Share, Device, and Settings buttons are not available on Windows 7.

## TV mode/PC mode

The remote control is available in both TV mode and PC mode.

- **TV mode:** TV mode will be activated by opening the TV program on desktop.
  - To open the TV program, press the **TV** button.
  - To exit the TV program, press the **Close** button.
- **PC mode:** In PC mode, you can use the computer as you would do normally.

The remote control's buttons are available only in specific modes, and some of the buttons may not function depending on the option.

## Setup utility (BIOS)

Define a boot password, change the boot priority, or configure the installed chipsets.

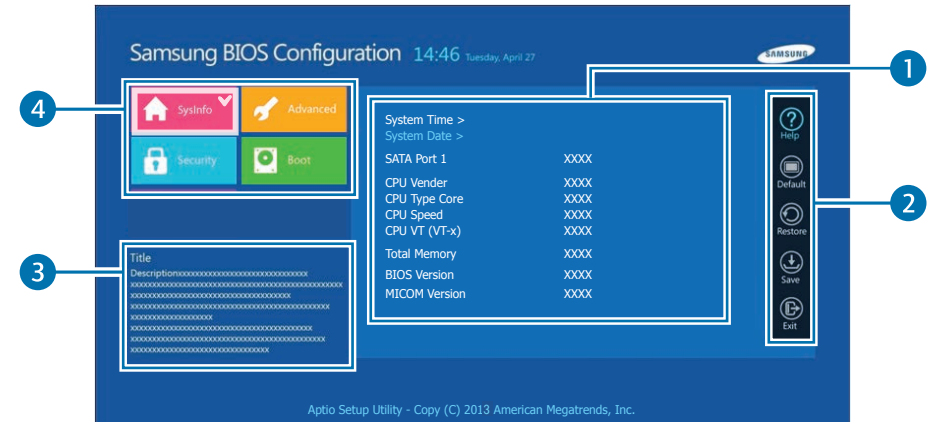

- Incorrect settings may cause the system to malfunction or crash.
- The BIOS setup screens, menus, and items may appear differently depending on the model and BIOS version.
- BIOS setup functions are subject to upgrades.

## Entering the BIOS screen

- 1 Turn on the computer.
- 2 Before the Samsung logo (Samsung ATIV) appears, press the **F2** key several times.
  - If the computer is password-protected, press the **F2** key several times before the password screen appears.
  - If the password screen or the Windows start screen appears, restart the computer and try again.

## Learning the BIOS screen

The BIOS setup screen appears as shown below.

Number	Name
1	<ul style="list-style-type: none"> <li>• Setup items</li> </ul>
2	<ul style="list-style-type: none"> <li>• Setup tools <ul style="list-style-type: none"> <li>– <b>Help:</b> View the help for BIOS set up.</li> <li>– <b>Default:</b> Return to default settings.</li> <li>– <b>Restore:</b> Cancel changes.</li> <li>– <b>Save:</b> Save settings.</li> <li>– <b>Exit:</b> Exit BIOS setup.</li> </ul> </li> </ul>
3	<ul style="list-style-type: none"> <li>• Help</li> </ul>
4	<ul style="list-style-type: none"> <li>• Setup menu <ul style="list-style-type: none"> <li>– <b>SysInfo:</b> View the basic specifications of the computer.</li> <li>– <b>Advanced:</b> Configure the chipsets and additional functions.</li> <li>– <b>Security:</b> Configure security functions.</li> <li>– <b>Boot:</b> Configure peripherals and boot-related settings.</li> </ul> </li> </ul>

- The BIOS setup screen appears only in English.
- When using a keyboard, only certain keys will control the BIOS setup screen.

## BIOS setup keys

Key	Description
▲ / ▼	• Change values.
◀ / ▶	• Move to another menu.
Enter	• Select an item or enter a sub-menu.
Space	• Change the slide button.
Esc	• Return to a higher level menu or to the <b>Exit</b> menu.
F1	• View the setup help.
F3	• Load the previous settings.
F9	• Load the default settings.
F10	• Save changes and exit the BIOS setup.

## Boot password

Setting a password with the BIOS enhances protection against viruses and hacking attacks.

- Do not forget your password or expose it to others.
- If you forget the **Supervisor Password** or **HDD Password**, request assistance from the service center. In this case, a service fee will be charged.
- When you forget the **User Password**, disable the **Supervisor Password**, and the **User Password** is also automatically disabled.

## Setting passwords

There are three password settings available; Supervisor Password, User Password, and HDD Password.

- **Supervisor Password** (low security level): This password is required when turning on the computer or attempt to enter the BIOS setup.
- **User Password** (low security level): This password is required to enter the BIOS setup. This password will be deactivated automatically if the Supervisor Password is disabled.
- **HDD Password** (high security level): This password is required to access the hard disk drive (HDD) from another computer. This password may not be supported, depending on the model.

## Setting a boot password

- 1 Turn on the computer.
- 2 Before the Samsung logo appears, press the **F2** key several times.
- 3 Access the **Security** menu.
- 4 Select a password type (**Supervisor Password**, **User Password**, or **HDD Password**).

If you cannot select an item or the **HDD Password Frozen** message appears, restart the computer. Then, press the **F2** key several times before the Samsung logo appears to enter the BIOS setup screen.

- 5 Enter a password and select **Ok**.  
The password can be up to 20 characters.

- 6 Enter the password again to confirm it and select **Ok**.

- 7 Select **Save** → **Yes** to save and restart.

- To enable the **Password on boot** option, set a **Supervisor Password** and enter the password when starting up the computer.
- To change the **HDD Password** after setting it, restart the computer.
- For some models, when the password entered message appears in the Setup Notice window, select **Ok** to complete the setup.

## Removing a password

- 1 Turn on the computer.
  - 2 Before the Samsung logo appears, press the **F2** key several times.
  - 3 Access the **Security** menu.
  - 4 Select a password type (**Supervisor Password**, **User Password**, or **HDD Password**).
  - 5 Enter the current password and select **Ok**.
  - 6 Without entering any characters, select **Ok** → **Ok**.
-  For some models, to cancel the password, select **Cancel** in the Setup Notice window.

## Boot priority

Change the boot priority from the BIOS setup.

- 1 Turn on the computer.
  - 2 Before the Samsung logo appears, press the **F2** key several times.
  - 3 Access the **Boot** menu.
  - 4 Select **Boot Device Priority**.
  - 5 Click an option menu to open the list.
  - 6 Select an option.
  - 7 Select **Save** → **Yes** to save and restart.  
Select **Exit** → **Yes** to restart without saving the changes.
-  To boot to DOS when using a bootable USB device, enter the BIOS setup. Then, select the **Boot** menu, and set the **Fast BIOS Mode** item to **Off**.

# Network & Internet

## Wired LAN

To access the Internet at home, set up an account with an Internet service provider (ISP). To purchase Internet service and a modem, contact a local ISP.

- Some features or procedures may differ depending on the model.
- These descriptions are written for Windows 8.1, so some figures and descriptions may differ from your operating system. Since the procedures for other Windows operating systems are similar, use the computer referring to these descriptions.

## Wired LAN

- 1 Connect a LAN cable to the LAN port on the computer.

- 2 On the desktop, open the Charms and select the **Settings** charm → **Control Panel** → **Network and Internet** → **Network and Sharing Center** → **Change adapter settings**.

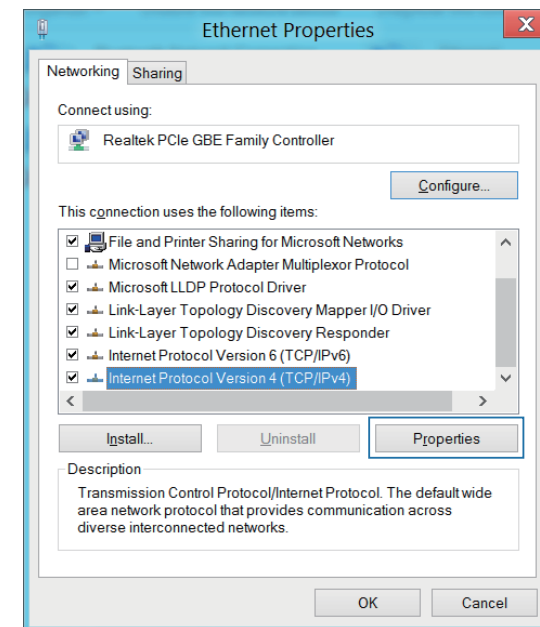

- 3 Right-click **Ethernet** and select **Properties**.

The LAN device name may differ depending on the computer's network device.

- 4 Select **Internet Protocol Version 4 (TCP/IPv4)** from the list of network settings → **Properties**.

- The Network Component name may differ depending on the operating system Installed.

- To add a network item such as a client, service, or protocol, select **Install** under the list of network items.

## 5 Configure the IP settings.

- When using DHCP, select **Obtain an IP address automatically**.
- When not using DHCP, contact the network administrator for the IP address. To use a static IP address, select **Use the following IP address** and set the IP address manually.

## 6 Select **OK** to save the settings.

## Wake on LAN (WOL) feature

Activate the system remotely from sleep mode when a signal, such as a magic packet command, is received via a wired LAN.

- 1 On the desktop, open the Charms and select the **Settings** charm → **Control Panel** → **Network and Internet** → **Network and Sharing Center** → **Change adapter settings**.
- 2 Right-click **Ethernet** and select **Properties**.
- 3 Select **Configure...** → **Power Management** → **Allow this device to wake the computer** → **OK**.
- 4 Restart the computer.
  - If the computer wakes up from sleep mode inadvertently, disable the Wake on LAN feature.
  - This feature may not work while using other power saving features. To disable other sleep functions, select the **Settings** charm → **Control Panel** → **Hardware and Sound** and then set **Power Options**.

- When connected to a 100Mbps/1Gbps wired LAN, a message appears informing the user of connection to a 10Mbps/100Mbps wired LAN when the computer wakes from sleep mode. This happens because restoring the network takes about 3 seconds. When the network is restored, the computer will be connected to the 100Mbps/1Gbps LAN.
- When the system is running on battery power, it may take a few seconds for the connection to be established when connecting a LAN cable. This is the result of power saving features designed to reduce battery consumption.
- When the system is running on battery power, the speed of a wired LAN is decreased automatically to reduce battery consumption. In this case, a 1Gbps/100Mbps LAN would function at the speed of a 100Mbps/10Mbps connection.

## Wireless LAN

Connect the computer to a wireless network to use the Internet.

The descriptions below are for computer models with a Wireless LAN card or device. A Wireless LAN device is optional. The pictures in this manual may differ from the actual product depending on the wireless LAN device model.

## About Access Point (AP)

An Access Point (AP) is a network device that bridges wired and wireless LANs and corresponds to a wireless hub in a wired network. Multiple devices can be connected to an AP.

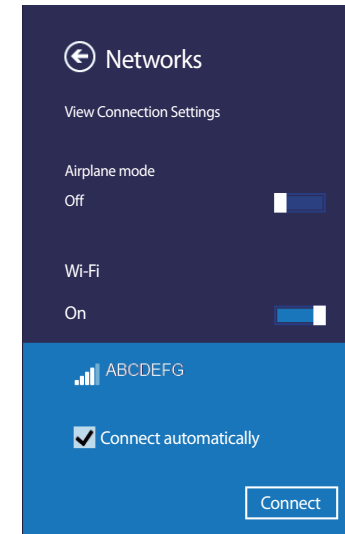

## Wi-Fi networks

- 1 Open the Charms and then select **Settings** charm → .

AP List

- 2 Select a network from the list of detected wireless networks → **Connect automatically** → **Connect**.

- 3 Enter a password, if necessary, and select **Next**.  
Once the computer has been connected to a wireless network, it will attempt to connect to it automatically when it is available. For the network key, please ask the network administrator.

## Airplane mode

Airplane mode disables all wireless functions on the computer. Only non-network services are available in Airplane mode.

To turn on **Airplane mode**, open the Charms and select the **Settings** charm → , and then select the **Airplane mode** switch.

# Applications

## Using applications

Applications include the software that make up the operating system. Windows provides basic applications for frequently-performed tasks.

- Some applications are available only in Windows 8.1 desktop mode.
- Images and features may differ depending on the model and the application version.
- **Third-party software related services**  
For descriptions about and service requests for third-party applications, please contact the relevant manufacturer. Some troubleshooting actions in response to service requests may not work depending on the application manufacturer.
- Applications that are provided by Samsung can be installed from **SW Update**.
- Some applications may not be supported depending on the model.

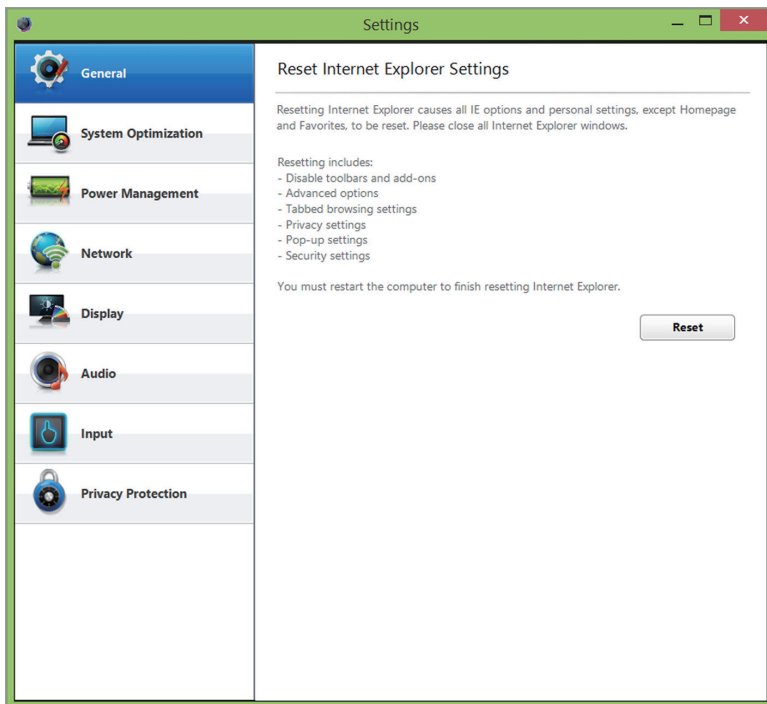

## Settings

**Settings**, a Samsung integrated settings application, offers various settings functions.

Images and features may differ depending on the model and the application version.

- 1 On the **Start** screen, click  at the lower-left edge, and select **Settings**.
- 2 Select an option to configure the corresponding function.

Menu	Description
General	<ul style="list-style-type: none"> <li>Set general settings.</li> </ul>
System Optimization	<ul style="list-style-type: none"> <li>Set system optimization settings.</li> </ul>
Power Management	<ul style="list-style-type: none"> <li>Set power related settings.</li> </ul>
Network	<ul style="list-style-type: none"> <li>Set network functions and settings.</li> </ul>
Display	<ul style="list-style-type: none"> <li>Set the screen brightness and color.</li> </ul>
Audio	<ul style="list-style-type: none"> <li>Set sound effect settings.</li> </ul>
Input	<ul style="list-style-type: none"> <li>Assign shortcut buttons on the remote control to launch programs or websites.</li> </ul>
Privacy Protection	<ul style="list-style-type: none"> <li>Set security functions and settings.</li> </ul>

## Software Update

Install and update Samsung applications and drivers on the computer easily and conveniently. This application enables the user to search for or download the BIOS, drivers, and applications over the Internet. Keep the computer performing better and more stably with **SW Update**.

- To check for available updates, the computer must be connected to the Internet.
- Only applications that have been installed with this application can be updated.
- Images and features may differ depending on the model and the application version.

1 On the **Start** screen, click  at the lower-left edge, and select **SW Update**.

2 Read and agree to the User Agreement.

This step appears only when the application runs for the first time.

3 Select **Install & Update**.

4 Select items to update → **OK**.

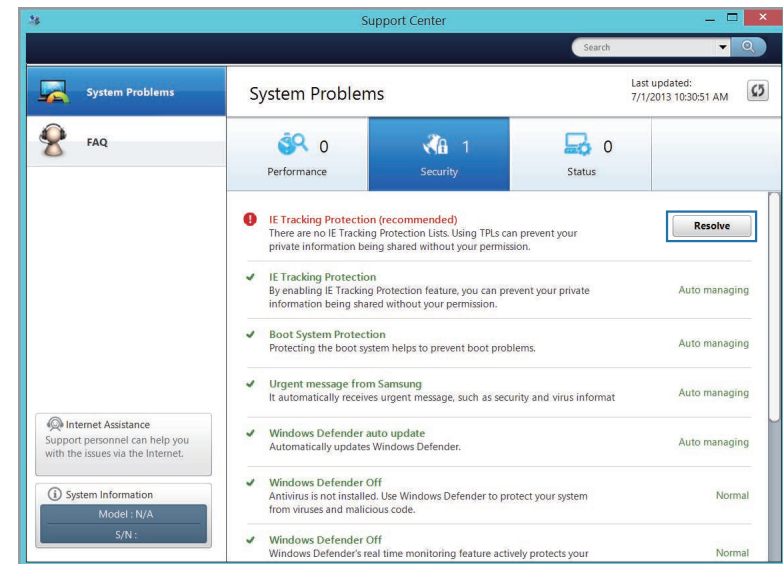

# Support Center

Diagnose the performance, security, and status of the computer and fix any problems it may have. Additionally, access the FAQ and search features to find solutions for the problems.

- The **Support Center** application may not be provided or may be a different version depending on the model.
- Images and features may differ depending on the model and the application version.

- 1 On the **Start** screen, click  at the lower-left edge, and select **Support Center**.
- 2 Select **Resolve** to correct the problems.

## ATIV Help (Self-help application solutions)

Use ATIV Help to access help-related content for Samsung computers from a smartphone.

Watch the ATIV Help videos to become familiar with new functions or to find solutions to problems.

ATIV Help videos are available on Samsung Tomorrow's YouTube page (<http://www.youtube.com/samsungnotebook>).

## Installing ATIV Help

- 1 On a smartphone, tap **Play Store** and search for **ATIV Help**.
- 2 Tap **Install** → **Agree** to complete the setup.

## Using ATIV Help

- 1 On a smartphone, tap **ATIV Help**.
- 2 On the ATIV HELP main screen, select the desired menu.

- 3 Select a menu and then a desired topic from the available content that appears.

You may incur additional charges when you access content.

## Quick Starter

Use Quick Starter to easily launch frequently used software from the desktop.

- Quick Starter may not be available or the application version may differ depending on the model.
- The features and icon images may differ depending on the model.

1 On the taskbar, click Quick Starter (🔌🕒).

2 Quick starter launches.

Menu	Description
Start menu	<ul style="list-style-type: none"> <li>• The start menu used in this device is similar to the start menu used in earlier versions of Windows 8.1.</li> <li>• Use the start menu to easily access various programs or settings, or to turn off the computer.</li> </ul>
Samsung Utilities	<ul style="list-style-type: none"> <li>• Launch software provided for Samsung computers.</li> </ul>

## Samsung Link (Optional)

Samsung Link enables you to remotely view/move files between the computer and the smartphone/tablet ("smartphone").

### Preparation

- To enable this option, you must have a registered Samsung account.
- This is available only when the computer is on.
- Follow the instructions below:
  1. Register the computer to Samsung Link.
  2. Register the smartphone to Samsung Link.
  3. Connect the two devices remotely.

- This is available with Samsung smartphones.
- The screen and user interface depend on the model and driver version.

## Registration

### Registering the computer to Samsung Link

1 Click the bottom-left icon  on the **Start** screen, and then click **Samsung Link**.

2 On the smartphone, provide your **Samsung account** information to log in.

If you are not a registered user, simply click **Create new account**, and follow the onscreen instructions.

#### What is Samsung Account?

Samsung Account is an integrated account service that allows users to log into and enjoy a variety of Samsung services on smartphones, tablets, websites, PCs, or on the TV with a single account.

### Registering the smartphone to Samsung Link

1 On the smartphone, select **Settings** → **Account** → **Add account**, and provide the same account information that you have registered to **Samsung Link**.

2 Run the **Samsung Link**  app on the smartphone to connect the computer and the smartphone.

- To check the connection, select **Samsung Link** → **Settings** → **Device Management** on the computer.
- For Galaxy S5 and later, it is not necessary to install or run **Samsung Link**  to connect the computer and the smartphone. You can view registered devices on the smartphone by selecting **Video**, **Music**, or **Gallery** → **Devices**.

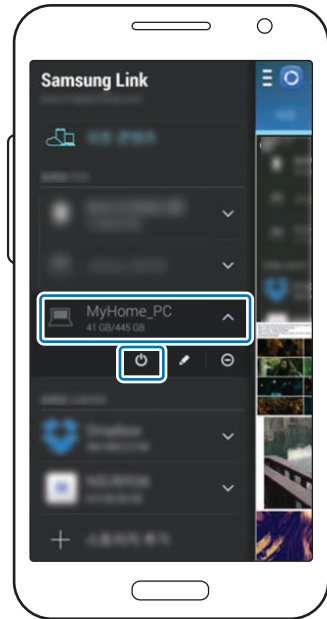

### Specifying a share folder

Specify a share folder for the content to share from the computer.

On the computer, run **Samsung Link** and select **Settings**. Then, specify devices and a share folder for content sharing.

## Controlling the computer from the smartphone

- 1 Run the **Samsung Link**  app on the smartphone.
- 2 Select the computer from the list, and then tap the power icon . Remote connection will be established.

- 3 Take advantage of the content sharing function.  
View, play, or upload/download the multimedia content between the computer and the smartphone.
  - **Upload:** Tap and hold an item on the smartphone, and then tap **Send**. Specify the computer from the list to start uploading.
  - **Download:** On the smartphone, tap and hold a content item from the computer, and then tap **Send**. Specify the smartphone from the list to start downloading.

To discontinue the remote connection, select the computer from the list, and then tap the  power icon.

# External devices

## Memory card

Use a memory card to transfer data to other devices, such as digital cameras or MP3 players. Memory cards are sold separately. Purchase a memory card with the necessary capacity for the requirement.

This computer supports the following types of memory cards.

Abbreviation	Description
SD	• Secure Digital
mini SD	• mini Secure Digital
micro SD	• micro Secure Digital
SDHC	• Secure Digital High Capacity
mini SDHC	• mini Secure Digital High Capacity
micro SDHC	• micro Secure Digital High Capacity
SDXC	• Secure Digital eXtended Capacity
micro SDXC	• micro Secure Digital eXtended Capacity

To use a mini or micro card, insert the card into an adapter before inserting it into the memory card slot.

- Some memory cards may not be fully compatible with the computer. Using an incompatible card may damage the computer or the memory card, or corrupt the data stored in it.
- Use caution to insert the memory card in the indicated direction.
- Store the card separately to prevent losing the card when moving the computer.
- Memory card speeds vary.

## Inserting a memory card

1 If a dummy card or a memory card adapter is inserted in the memory card slot, remove it.

2 Insert a memory card into the memory card slot in the indicated direction.

Use a memory card adapter to insert a micro memory card into the memory card slot.

For mini memory cards, use a mini card adapter.

A memory card adapter is an optional item and may not be provided with some models.

3 Select the pop-up message to open the memory card folder.  
If a pop-up message appears, click the corresponding window  
→ **Continue without scanning.**

4 Select **Open folder to view files.**

5 Save, move, or delete data on the memory card.  
The memory card folder opens only on the desktop.

## Removing a memory card

Grasp the end of the card and pull it out of the slot.

## Formatting a memory card

Format the memory card to remove all data or before using it for the first time.

Formatting a memory card deletes all data saved on the card. If necessary, back up important data before formatting the card.

- 1 On the taskbar, select File Explorer (📁).
- 2 Right-click the memory card drive, and then select **Format**.
- 3 Select **Start**.

- To use a memory card to exchange data with a digital device, such as a digital camera, formatting the data with the digital device is recommended.
- When trying to use a formatted memory card in another digital device, format the memory card again in the device.
- Inserting and removing a memory card repeatedly may damage the memory card.
- Secure Digital Input Output (SDIO) is not supported.
- If the write-protect tab is in the locked position, you cannot format, write, or delete data on the card.

## External display

Connecting the computer to an external display device can be useful for presentations or when watching a movie. The cables required to connect an external display are sold separately. The computer supports HDMI cables.

- 1 Using an **HDMI cable**, connect the **HDMI output port** of the computer to the **HDMI input port** of the TV.

- This is only supported for models that support a TV output port (HDMI).
- When a TV provides more than one HDMI port, connect the computer to the **DVI IN** port.
- When connecting the computer to a TV, switch the external input mode of the TV to **HDMI**.

- 2 Select **Charms menu** → **Devices** charm → **Project** → **Second Screen**.

Select a desired monitor mode.

	<b>PC screen only</b> The contents are only displayed on the PC monitor (current device).
	<b>Duplicate</b> The contents of the current device are displayed on the external device as well.
	<b>Extend</b> The screen of the current device is expanded to the external device.
	<b>Second screen only</b> The contents are displayed only on the screen of the external device.

External Monitor / TV is not supported in the DOS Command Prompt window.

## Using the Security Slot

You can secure the computer by connecting a lock and cable to the Security Slot.

To use this feature, you have to purchase the lock and cable additionally. To use the lock and cable, refer to the product manual.

Tie the lock and cable to a fixed object and install the other end of the cable to the security slot.

# Troubleshooting

## Recover/Backup

When a problem occurs with the computer, it is possible to easily recover the computer back to the factory default settings by using the **Recovery** application (Recover/Backup). It is also possible to recover the computer to a previously backed up point. Back up important data regularly before a problem occurs with the computer.

- The **Recovery** application may not be provided in models with less than 64 GB of memory. For models with less than 64 GB of memory, recover the computer to the factory default settings by reinstalling Windows.
- Some functions may differ or may be unavailable, depending on the version. Refer to the application's help for more information.
- Run the **Recovery** application with administrator privileges.
- CD/DVD drives are not supported by the **Recovery** application.
- Recovering the computer erases the data or applications saved after a backup point. Therefore, back up important data regularly before a problem occurs with the computer.

## Recovering to factory default

Recover the computer to factory default settings. If necessary, back up important data to an external storage device before restoring the system. See Backing up the current system.

**1 When the computer starts Windows:** On the **Start** screen, click  at the lower-left edge, and select **Recovery**.

**When the computer does not start Windows:** Turn on the computer and press the **F4** key several times before the Samsung logo (Samsung ATIV) appears.

**2** Select **Backup Management** → **Factory image** → **Recover**.

### 3 Select **Recover**.

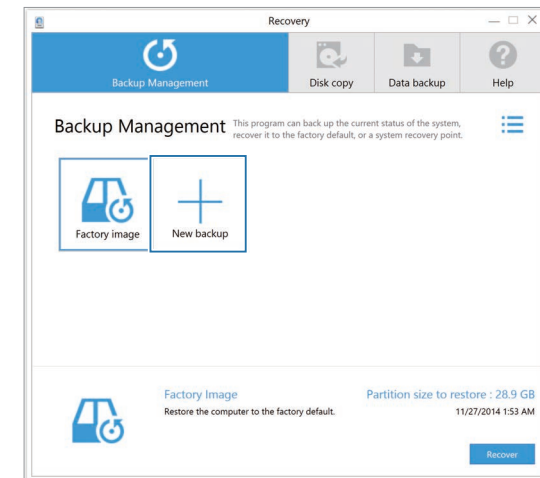

### 4 Follow the on-screen instructions to complete the recovery.

## Backing up the current system

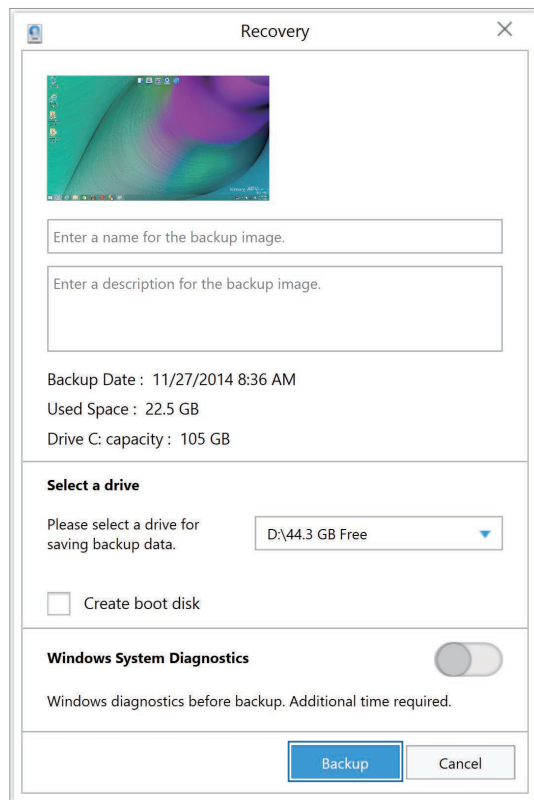

Back up important data to an alternate internal drive or an external storage device regularly to prevent data loss.

### 1 Select **Backup Management** → **New backup**.

## 2 Select a drive from the drive list → **Backup.**

- When backing up to an external storage device, connect the device to the computer and then select the external drive.

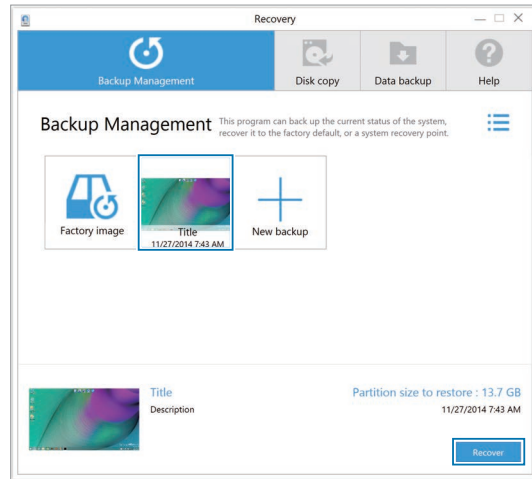

## 3 Follow the on-screen instructions to complete the backup.

## Recovering after a backup

Select a backup point saved on an alternate internal drive or an external storage device to recover the computer to the point.

- 1 When backing up to an external storage device, connect the device to the computer.
- 2 On the **Start** screen, click ⏴ at the lower-left edge, and select **Recovery**.

3 Select **Backup Management** → a backup image → **Recover**.

4 Follow the on-screen instructions to complete data recovery.

## Copying the drive (making a disk image)

To replace the drive, move the data to the new drive by making a disk image. The new drive must be large enough to hold the data from the current drive.

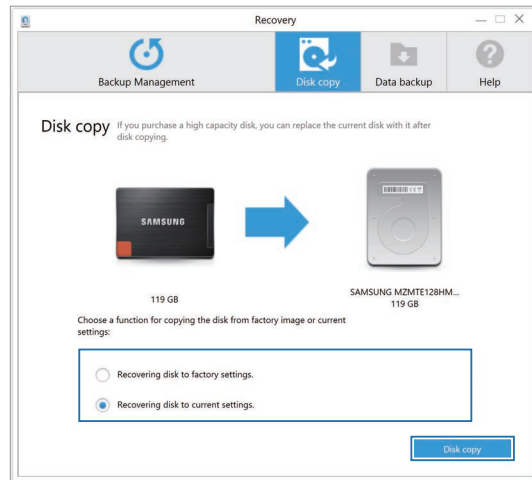

Purchase an external hard drive connector separately to connect the new drive to the computer.

- 1 Connect the new drive to the computer with an external hard drive connector.
- 2 On the **Start** screen, click ⏴ at the lower-left edge, and select **Recovery**.
- 3 Select **Disk copy**.

### 4 Select a recovery point → **Disk copy.**

The data on the disk is copied to the new disk.

### 5 After the data is saved to another drive, open the cover at the bottom of the computer and replace the existing drive with the new one.

If the cover is difficult to open, contact the Samsung Service Center to request assistance. You will be charged for this service.

## Windows recovery function

If the **Recovery** application is not supported by the computer, recover system to factory default settings using the recovery function of Windows.

Reinstalling Windows will erase all data saved on the computer. Back up application and personal data to an external storage device before reinstalling Windows.

1 Open the Charms and select the **Settings** charm → **Change PC settings** → **Update and recovery** → **Recovery**.

2 Select **Get Started** under **Remove everything and reinstall Windows**.

Select **Get Started** under **Refresh your PC without affecting your files** to recover the computer while keeping photos, videos, music files, and documents.

3 Follow the on-screen instructions to proceed with the reinstallation.

After a recovery, on the **Start** screen, click  at the lower-left edge, and select **SW Update** to install the necessary Samsung applications.

## Q&A

When experiencing problems with the computer, try these solutions.

### Windows

#### Where is the Shut down button?

##### Mouse:

- At the upper-right corner of the **Start** screen, select **Power** (⏻) → **Shut down**.
- Open the Charms and select the **Settings** charm → **Power** → **Shut down**.
- Right-click the Start button, and then click **Shut down or sign out** → **Shut down**.

## My application disappeared from the Start screen. How can I correct this?

### Mouse:

- 1 On the **Start** screen, click  at the lower-left edge to view installed applications.
- 2 Right-click an application, and then select **Pin to start**.

## How can I uninstall an application?

- 1 On the desktop, open the Charms and select the **Settings** charm.
- 2 Select **Control Panel** → **Programs** → **Uninstall a program** → an application → **Uninstall**.  
Alternatively, right-click the Start button, and then select **Programs and Features**.  
Select an application to uninstall → **uninstall**.

## How can I change the screen settings, environment settings, color, and so on?

Configure the lock screen, **Start** screen, and account picture by opening the Charms and selecting the **Settings** charm → **Change PC settings** → **PC and devices**. To configure any other features, on the desktop, open the Charms and select the **Settings** charm → **Control Panel**.

## Why am I unable to run Active X in Internet Explorer when I launch it on the Start screen?

The version of Internet Explorer that appears on the **Start** screen complies with HTML5 web standards, so it does not support Active X. Launch Internet Explorer on the desktop to view websites that require Active X.

## Can I remove Windows 8 or Windows 8.1 and install a different operating system?

To install a different operation system on the computer, change the BIOS settings first. For more information, visit <http://www.samsung.com> → Customer support → Troubleshooting and search for **Windows 8** or **Windows 8.1**.

## How can I start my computer in DOS?

To start the computer in DOS via a USB device:

- 1 Turn on the computer.
- 2 Before the Samsung logo appears, press the **F2** key several times.
- 3 Select the **Boot** menu.
- 4 Set **Fast BIOS Mode** to **Off**.
- 5 Set **Secure boot Control** to **Off**.
- 6 Set **OS Mode Selection** to **CSM mode** and then restart the computer.

## Recovery

### What is a Recovery Area?

The computer has an additional partition for restoring data or saving backup files (only for models with the **Recovery** application). This partition is called a Recovery Area and it includes a recovery image comprised of the operating system and applications.

### Why is the capacity representation of the hard disk drive (HDD) in Windows different from the product specifications?

The capacity of the storage device (HDD or SSD) of the manufacturer is calculated assuming that 1KB=1,000 Bytes. However, the operating system (Windows) calculates the storage device capacity assuming that 1KB=1,024 Bytes, and therefore the capacity representation of the HDD in Windows is smaller than the actual capacity. The capacity representation in Windows may be smaller than the actual capacity because some applications occupy a certain area of the HDD outside of Windows.

For models with the **Recovery** application, the HDD capacity representation in Windows may be smaller than the actual capacity because the **Recovery** application uses a hidden area of 5-20 GB of the HDD to save the recovery image, and that hidden area is not counted towards the total size available to Windows. The size of the **Recovery** application varies by model.

## **What is a recovery image?**

This refers to specifications about the operating system, drivers, and software that are converted to a data image. It is required to recover the computer and is embedded in the computer's HDD. However, this is not provided for storage devices where the capacity is less than 64 GB, due to their small capacities.

## **How can I recover a computer that does not have the Recovery application?**

Recover the computer with the recovery function provided by Windows. Refer to the Recover Functionality item in the help for more details.

## **Camera/Microphone**

### **The camera and the microphone are not working. How do I turn them on again?**

When the recording protect mode is activated, the camera and microphone will not work.

To turn off the recording protect mode, hold down the **Fn** key and then press the **F11** key.

# Appendix

## Product specifications

The system specifications may differ depending on the derived models. For detailed system specifications, refer to the product catalogue.

Item	Specification
Operating environment	<ul style="list-style-type: none"><li>• Temperature: -5–40 °C for storage, 10–35 °C when operating</li><li>• Humidity: 5–90 % for storage, 20–80 % when operating</li></ul>
AC/DC rating	<ul style="list-style-type: none"><li>• Input: 100–240 VAC, 50–60 Hz</li><li>• Output: 19 VDC 4.74 A, 19 VDC 3.16 A</li></ul>
PC rating	<ul style="list-style-type: none"><li>• 19 VDC 3.16 A (60 W)</li></ul>

- Optional components may not be provided or different components may be provided depending on the model.
- The system specifications are subject to change without notice.
- The Storage device capacity of a computer in which **Recovery** is installed, is represented as smaller than the product specification.
- Replacement, addition, or upgrade of memory is unavailable for this computer hardware. To replace or upgrade the memory and to replace the storage device, contact the Samsung Service Center.
- The amount of memory that Windows can use may be smaller than the actual amount of memory available.

## Ergonomic tips

Maintaining a proper posture during computer use is very important to prevent physical injury. Improper or prolonged keyboard use may result in repetitive strain injury. Viewing the monitor screen for extended periods of time may result in eye strain. Therefore, please follow these guidelines carefully when setting up and using the computer.

### Back and neck

- Use an adjustable chair with firm, comfortable support.
- Adjust the height of your chair so that thighs are horizontal to the floor and feet are flat on the floor.
- The back of the chair should support the lower back. Adjust the backrest to fit your body properly.
- Sit back fully in your chair and straighten the back and neck. Avoid leaning forward or craning your neck toward the computer screen.
- Avoid using the computer while lying down or on your lap. If the computer's temperature increases, there is a danger of burn injury.

- The instructions in this manual have been prepared so that they can be applied to the range of needs of general users. If the user is not included in the range, the recommendations should be applied according to the user's needs.
- Images may differ from actual products.

## Arms and hands

- When using the keyboard and touchpad, the shoulders should be relaxed. The upper arm and forearm should form an angle that is slightly greater than a right angle, with the wrist and hand in almost a straight line.
- Use a light touch when typing or using the touchpad and keep the hands and fingers relaxed. Avoid rolling the thumbs under your palms or supporting the wrists on the desk while typing.
- Use an external keyboard and mouse when using the computer for long periods. When using an external keyboard and mouse, position the devices at the same height as the computer and within comfortable reach.

## Eye position and display illumination

- Position the screen at least 50 cm away from your eyes.
- Adjust the height of the screen so that its top edge is equal to or just below the level of your eyes.
- Avoid setting the screen's brightness settings excessively high.
- Keep the screen clean.
- If wearing glasses, clean them before using the computer.
- When referring to printed content while typing, use a static paper holder to hold the paper at about the same height as the monitor.

## Hearing and volume control

- Ensure that volume is not too loud before using headphones.
- Avoid using headphones for long periods of time.
- Default audio settings can be changed by software and driver updates without your knowledge. Always recheck equalizer and volume settings before listening to audio.
- To prevent possible hearing damage, do not listen at high volume levels for long periods.

## Operating conditions

- Take at least a 10 minute break every hour.
- Avoid using the computer in dark locations. Use the computer with as much ambient light as you would when reading a book.
- Indirect illumination is recommended. Use a curtain to prevent reflections and glare on the screen.
- While operating a computer and talking on the phone, use a headset. Using the computer while holding a phone on your shoulder or with your neck may lead to muscle strain or injury.
- Keep frequently used items within reach.
- Use the computer only within the temperature and humidity ranges specified in this manual.

## Safety precautions

This safety information relates to computer use. Some of the content may be not applicable to your computer. To prevent injury or damage to your computer, read the safety information before using it.

- Since this is commonly applied to Samsung Computers, some pictures may differ from actual products.
- The term “product,” as used in this manual, refers to basic components, such as the computer, battery, adapter and optional accessories provided by Samsung.

### Warning

Failure to follow instructions marked with this symbol may cause personal injury and even fatality.

### Installation related

**Keep the computer at least 15 cm away from any object.**

Failure to do so may result in computer malfunction or injury.

**Do not place or use the computer on slanted or vibrating places.**

Failure to do so may result in computer malfunction or damage.

**To avoid danger of suffocation, keep the plastic bag away from infants and children.**

Putting a plastic bag over the head may result in suffocation.

## Power related

The power plug and wall outlet figures may differ depending on the country specifications and the product model.

**Handle the power cord with care.**

- Do not touch with wet hands.
- Do not use a damaged or loose power cord.
- Use only specified voltage/capacity.
- Firmly insert the power cable into the AC adapter.
- Do not unplug the power cord by pulling the cable only.
- Unplug the wall-mount AC adapter (adapter and plug integrated type) from the wall outlet while holding the body and pulling it.

Failure to do so may result in electric shock or fire.

**Connect the power cord to the AC adapter firmly.**

Otherwise, there is a danger of fire due to an incomplete contact.

**Use only the AC adapter supplied with the product.**

Using another adapter may cause the screen to flicker.

**Use only properly earthed electric sockets or extension cords.**

Connecting to unearthed electric sockets or extension cords does not protect users from earth faults. Unearthed electric sockets or extension cords may cause electric shock or fire.

**If water or another substance enters the product, disconnect the power cord and contact the Samsung Service Center. For notebook computers that are provided with an external removable battery, separate the battery also.**

Damage to the device within the computer may cause electric shock or fire.

**Keep the power cord or outlet clean with a dry towel so that they are not covered with dust.**

Failure to do so may result in electric shock or fire.

**Do not bend or damage the power cable or the AC adapter with a heavy or sharp-edged object.**

A damaged cable or cord may result in electric shock or fire.

## Battery usage related

**Keep the battery, AC adapter, and the power cord away from infants and pets.**

Failure to do so may result in electric shock or computer malfunction.

**Use only Samsung-approved battery and AC adapter.**

Batteries or AC adapters that are not approved by Samsung may malfunction from a defective safety device, resulting in an explosion or fire.

**Take care not to allow metal objects such as a key or clip to touch the battery terminal (metal parts).**

This may cause excessive current and result in fire, burns, or damage to the battery.

**If the product leaks, emits strange odors, or swells, immediately stop using the product and contact the Samsung Service Center.**

Failure to do so may result in an explosion or fire.

**To use the computer safely, replace a dead battery with a new, authorized battery.**

**When removing the real time clock (RTC) battery, keep it away from infants and children.**

If a child swallows the battery, the child may suffocate. If this happens, immediately contact a doctor.

## Usage related

**Do not use the computer on heated floors or electric pads, or on beds, blankets, or cushions that block the ventilation of the computer.**

In these environments, be careful not to block the vent of the computer, which is normally at the side or bottom of the computer. A blocked vent causes the computer to overheat, resulting in an explosion, fire, burns, or computer malfunction.

**Do not use the computer in very damp locations such as a bathroom.**

Failure to do so may result in computer malfunction or electric shock. Use the computer within the recommended temperature and humidity range (10–35 °C, 20–80 % RH).

**Never heat the product or put the product into a fire. Do not put or use the product in a hot location such as a sauna, inside a vehicle exposed to heat, and so on.**

There is a danger of explosion or fire.

**Before cleaning the computer, disconnect all the cables that are connected to the computer. For notebook computers that are provided with an external removable battery, separate the battery also.**

Failure to do so may result in electric shock or fire.

**Keep the product away from water or liquid.**

Water or liquid entering the computer may cause a short circuit inside the product, resulting in electric shock or fire.

**If the product is dropped or broken, disconnect the power cord and contact the Samsung Service Center. For notebook computers that are provided with an external removable battery, separate the battery also.**

Using a broken computer may result in electric shock or fire.

**Do not touch the computer vents or the connected AC adapter for extended periods while the computer is on.**

Contact with the vent or the connected AC adapter for extended periods may result in lowtemperature burns, such as redness on the skin.

## Upgrade related

**Do not attempt to upgrade the computer, unless you are qualified.**

Contact the Samsung Service Center or an electrician.

**Follow all instructions as specified in the user manual.**

Do not disassemble any other parts by yourself. Failure to do so may result in computer malfunction, electric shock, or fire.

**Do not disassemble the power supply unit, the AC adapter, or the battery under any circumstances.**

Failure to do so may result in electric shock, fire, or an explosion.

**Shut down the computer and disconnect all cables before disassembling the computer. If the notebook is an external and removable battery type, remove the external battery.**

Failure to do so, may cause electric shock.

## Storage and movement related

**Do not close the LCD panel and put the computer into a bag to move it when it is still turned on.**

The computer may overheat and there is a danger of fire. Shut the computer down properly before moving it.

**When using wireless communication (LAN, Bluetooth, etc) always follow applicable instructions. For example, airlines and hospitals have strict requirements.**

**Avoid exposing a drive to magnetic fields. Security devices with magnetic fields include airport walk-through devices and security wands. The airport security devices that check carry-on luggage, such as conveyor belts, use x-rays instead of magnetism and will not damage a drive.**

**When carrying the notebook computer with other items, such as the adapter, mouse, books etc, take care not to press anything against the notebook computer.**

If a heavy object is pressed against the notebook computer, a white spot or stain may appear on the LCD. Therefore, take care not to apply any pressure to the notebook.

In this case, place the notebook computer in a separate compartment away from the other objects.

## **Caution**

Failure to follow instructions marked with this symbol may cause slight injury or damage to the product.

### **Installation related**

**Do not block the ports (holes), vents, etc. of the product and do not insert objects.**

Damage to a component within the computer may cause electric shock or fire.

**When using the computer with it lying on its side, place it so that the vents face upwards.**

Failure to do so, may cause the internal temperature of the computer to rise and the computer to malfunction or halt.

**Do not place a heavy object over the product.**

This may cause a problem with the computer. In addition, the object may fall and cause injury, or damage the computer.

**Connect the power cord to a nearer consent when installing the computer.**

If a problem occurs to the computer and disconnection from the consent is delayed, there is a danger of electric shock or fire.

**Dispose of worn-out batteries properly.**

- There is a danger of fire or explosion.
- The battery disposal method may differ depending on your country and region. Dispose of the used battery in an appropriate way.

**Do not throw or disassemble the battery and do not put it into water.**

This may cause an injury, fire or explosion.

**Use only a battery authorized by Samsung.**

Failure to do so may cause an explosion.

**Avoid contact with metal objects such as car keys or clips when keeping or carrying a battery.**

Contact with a metal may cause excessive current and a high temperature and may damage the battery or cause a fire.

**Charge the battery according to the instructions in the manual.**

Failure to do so, may cause an explosion or fire from damage to the product.

**Do not heat the product(or battery) or expose it to heat (e.g. inside a vehicle during the summer).**

There is a danger of explosion or fire.

**Usage related**

**Use the pen for its intended purpose only.**

Using the pen improperly may cause physical injury.

**Do not place a candle, light cigar, etc. over or on the product.**

There is a danger of fire.

**Make sure to have the product tested by a safety service engineer after repairing the product.**

Authorized Samsung Repair Centers will carry out safety checks after a repair. Using a repaired product without testing it for safety may cause an electric shock or fire.

**In case of lightning, immediately turn the system off, disconnect the power cord from the wall outlet and phone line from modem. Do not use a modem or phone.**

There is a danger of electric shock or fire.

**Connect only permitted devices to the connectors or ports of the computer.**

Failure to do so, may cause electric shock and fire.

**Close the LCD panel only after checking if the notebook computer is turned off.**

The temperature may rise and it may cause deformation of the product.

**Do not press the Eject Button while the CD-ROM drive is in operation.**

You might lose data and the disk might be suddenly ejected and could cause an injury.

**Do not drop, hit, or apply excessive force to the computer.**

Failure to do so may result in physical injury or data loss.

**Do not touch the antenna with electricity facility such as the power outlet.**

There is a danger of electric shock.

**When handling computer parts, follow the instructions on the manual supplied with the parts.**

Failure to do so, may cause damage to the product.

**If the computer emits smoke, or there is a burning smell, disconnect the power plug from the wall outlet and contact the Samsung Service Center immediately. If the notebook is external, and removable battery type, remove the external battery.**

There is a danger of fire.

**Do not use a damaged or modified CD.**

There is a danger of damaging the product or personal injury.

**Do not insert the fingers into the PC Card Slot.**

There is a danger of injury or electric shock.

**Use recommended computer cleansing solution when cleaning the product and only use the computer when it is completely dried.**

Failure to do so may cause electric shock or fire.

**Emergency disk eject method using paperclip should not be used while the disk is in motion. Make sure to use the emergency disk eject method only when the Optical Disk Drive has stopped.**

There is a danger of injury.

**Do not place your face close to the Optical Disk Drive tray when it is operating.**

There is a danger of injury due to an abrupt ejection.

**Keep the product away from magnetic fields.**

- Magnetic materials may cause the product malfunction or cause the battery to discharge.
- The magnetism in the computer may damage the information in the magnetic stripe cards such as credit cards.

**Upgrade Related**

**Take care when touching the product or parts.**

The device may be damaged or you may be injured.

**Take care not to throw or drop a computer part or device.**

This may cause injury or damage to the product.

**Make sure to close the computer cover before connecting the power after a reassembly.**

There is a danger of electric shock if your body touches an internal part.

**Use parts authorized by Samsung only.**

Failure to do so, may cause fire or damage the product.

**Never disassemble or repair the product by yourself.**

If the computer serviced or repaired by an unqualified technician, the warranty will not cover the repair fees. There is a danger of accident. Use authorized Samsung Service Centers.

**To connect a device that is not manufactured or authorized by Samsung, enquire at the Samsung Service Center before connecting the device.**

There is a danger of damaging the product.

**Storage and movement related**

**Properly shut down, disconnect and secure the computer cables before moving it.**

Failure to do so may damage the computer or cause someone to trip over a loose cable.

**For long periods of not using the notebook computer, discharge the battery and preserve as it is detached. (For external and removable battery type)**

The battery will be preserved at its best condition.

**Do not operate or watch the computer while driving a vehicle.**

There is a danger of a traffic accident. Please concentrate on driving.

## **Cautions on preventing data loss (Hard disk management)**

### **Take care not to damage the data on a hard disk drive.**

- A hard disk drive is so sensitive to external impact that an external impact may cause loss of data on the surface of the disk.
- Take extra care, because moving the computer or an impact on the computer when it is turned on may damage the data of the hard disk drive.
- Samsung is not liable for any loss of data on the hard disk drive.

### **Causes that may damage the data of a hard disk drive and the hard disk drive itself.**

- The data may be lost when an external impact is applied to the disk while disassembling or assembling the computer.
- The data may be lost when the computer is turned off or reset by a power failure while the hard disk drive is operating.
- The data may be lost and irrecoverable due to a computer virus infection.
- The data may be lost if the power is turned off while running an application.
- Sudden impact or movement to the computer while the hard disk drive is operating, may cause files to be corrupted or bad sectors on the hard disk.

**To prevent data loss due to damage to the hard disk drive, please back up the data frequently.**

## **LCD bad pixels principle of the computer**

Samsung observes strict specifications regarding the quality and reliability of the LCD. However, there is a small chance that a few pixels may be bad. A large number of bad pixels can cause problems with the display, but a small number of bad pixels does not generally affect computer performance.

Samsung's quality standards for bad pixels are as follows:

- Bright dot: 2 or fewer
- Black dot: 4 or fewer
- Combination (bright and dark): 4 or fewer

## **Cleaning the LCD screen**

Clean the LCD screen with a soft cloth dampened with computer cleansing detergent. When cleaning the screen, move the cloth in one direction. Do not use excessive force. Doing so may damage the LCD screen.

## Important safety information

### Safety instructions

The system is designed and tested to meet the latest standards for safety of information technology equipment. However, to ensure safe use of this product, it is important that the safety instructions marked on the product and in the documentation are followed.

Always follow these instructions to help guard against personal injury and damage to the system.

### Setting up the system

- Read and follow all instructions marked on the product and in the documentation before operating the system. Retain all safety and operating instructions for future use.
- Do not use this product near water or a heat source such as a radiator.
- Set up the system on a stable work surface.
- The product should be operated only with the type of power source indicated on the rating label.
- Ensure that the electrical outlet to power the equipment is easily accessible in case of fire or short circuit.
- If the computer has a voltage selector switch, make sure that the switch is in the proper position for your area.
- Openings in the computer case are provided for ventilation. Do not block or cover these openings. Make sure you provide adequate space, at least 6 inches (15 cm), around the system for ventilation when setting up your work area. Never insert objects of any kind into the computer ventilation openings.

- Ensure that the fan vents on the bottom of the casing are clear at all times. Do not place the computer on a soft surface, doing so will block the bottom vents.
- When using an extension cord with this system, make sure that the total power rating on the products plugged into the extension cord does not exceed the extension cord power rating.
- For Notebooks with glossy display bezels the user should consider the placement of the Notebook as the bezel may cause disturbing reflections from surrounding light and bright surfaces.

### Care during use

- Do not walk on the power cord or allow anything to rest on it.
- Do not spill anything on the system. The best way to avoid spills is to not eat or drink near the system.
- Some products have a replaceable CMOS battery on the system board. There is a danger of explosion if the CMOS battery is replaced incorrectly. Replace the battery with the same or equivalent type recommended by the manufacturer. Dispose of batteries according to the manufacturers instructions. If the CMOS battery requires replacement insure that a qualified technician performs the task.
- When the computer is turned off, a small amount of electrical current still flows through the computer.

To avoid electrical shock, always unplug all power cables, remove the battery and modem cables from the wall outlets before cleaning the system.

- Unplug the system from the wall outlet and refer servicing to qualified personnel if:
  - The power cord or plug is damaged.
  - Liquid has been spilled into the system.
  - The system does not operate properly when the operating instructions are followed.
  - The system was dropped or the casing is damaged.
  - The system performance changes.

### **The instruction on safety operation of the computer**

- 1** When installing and operating devices please refer to safety requirements in the user manual.
- 2** Devices can be used only with the equipment specified in the technical specifications of the devices.
- 3** If any smell of burning or smoke is detected from the computer the unit should be switched off and battery removed. The unit should be checked by a qualified technician before reuse.
- 4** Service and repair of devices should be carried out by authorized service centers.
- 5** Do not allow the portable computer to operate with the base resting directly on exposed skin for extended periods of time. The surface temperature of the base will rise during normal operation (particularly when AC Power is present). Allowing sustained contact with exposed skin can cause discomfort or eventually a burn.

## Replacement parts and accessories

Use only replacement parts and accessories recommended by manufacturer.

To reduce the risk of fire, use only No. 26 AWG or larger telecommunications line cord.

Do not use this product in areas classified as hazardous. Such areas include patient care areas of medical and dental facilities, oxygen rich environments, or industrial areas.

## Battery disposal

Do not put rechargeable batteries or products powered by non-removable rechargeable batteries in the garbage.

Contact the Samsung Service Center for information on how to dispose of batteries that you cannot use or recharge any longer. Follow all local regulations when disposing of old batteries.

THERE IS RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.

DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

## Laser safety

All systems equipped with CD or DVD drives comply with the appropriate safety standards, including IEC 60825-1. The laser devices in these components are classified as “Class 1 Laser Products” under a US Department of Health and Human Services (DHHS) Radiation Performance Standard. Should the unit ever need servicing, contact an authorized service location.

- **Laser Safety Note:** Use of controls or adjustments or performance of procedures other than those specified in this manual may result in hazardous radiation exposure. To prevent exposure to laser beams, do not try to open the enclosure of a CD or DVD drive.
- Class 1M laser radiation when operating part is open. Do not view directly with optical instruments.
- Class 3B invisible laser radiation when open. Avoid exposure to the beam.

## Connect and disconnect the AC adapter

The socket-outlet shall be installed near the equipment and shall be easily accessible.

**Do not unplug the power cord by pulling the cable only.**

## Power cord requirements

The power cord set (all plug, cable and AC adapter plug) you received with your computer meets the requirements for use in the country where you purchased your equipment.

Power cord sets for use in other countries must meet the requirements of the country where you use the computer. For more information on power cord set requirements, contact your authorized dealer, reseller, or service provider.

## General requirements

The requirements listed below are applicable to all countries:

- All power cord sets must be approved by an acceptable accredited agency responsible for evaluation in the country where the power cord set will be used.
- The power cord set must have a minimum current capacity of 7A and a nominal voltage rating of 125 or 250 volts AC, as required by each country's power system. (USA only)
- The appliance coupler must meet the mechanical configuration of an EN 60 320/IEC 320 Standard Sheet C7 (or C5) connector, for mating with appliance inlet on the computer.

## Regulatory compliance statements

### Wireless guidance

(If fitted with 2.4G band or 5G band)

Low power, Radio LAN type devices (radio frequency (RF) wireless communication devices), operating in the 2.4GHz/5GHz Band, may be present (embedded) in the notebook system. The following section is a general overview of considerations while operating a wireless device.

Additional limitations, cautions, and concerns for specific countries are listed in the specific country sections (or country group sections). The wireless devices in the system are only qualified for use in the countries identified by the Radio Approval Marks on the system rating label. If the country you will be using the wireless device in, is not listed, please contact your local Radio Approval agency for requirements. Wireless devices are closely regulated and use may not be allowed.

The RF field strength of the wireless device or devices that may be embedded in the notebook are well below all international RF exposure limits as known at this time. Because the wireless devices (which may be embedded into the notebook) emit less energy than is allowed in radio frequency safety standards and recommendations, manufacturer believes these devices are safe for use. Regardless of the power levels, care should be taken to minimize human contact during normal operation.

Some circumstances require restrictions on wireless devices.

Examples of common restrictions are listed on the next page:

- Radio frequency wireless communication can interfere with equipment on commercial aircraft. Current aviation regulations require wireless devices to be turned off while traveling in an airplane. 802.11ABGN (also known as wireless Ethernet or Wi-Fi) and Bluetooth communication devices are examples of devices that provide wireless communication.
- In environments where the risk of interference to other devices or services is harmful or perceived as harmful, the option to use a wireless device may be restricted or eliminated. Airports, Hospitals, and Oxygen or flammable gas laden atmospheres are limited examples where use of wireless devices may be restricted or eliminated. When in environments where you are uncertain of the sanction to use wireless devices, ask the applicable authority for authorization prior to use or turning on the wireless device.
- Every country has different restrictions on the use of wireless devices. Since your system is equipped with a wireless device, when traveling between countries with your system, check with the local Radio Approval authorities prior to any move or trip for any restrictions on the use of a wireless device in the destination country.

- If the system came equipped with an internal embedded wireless device, do not operate the wireless device unless all covers and shields are in place and the system is fully assembled.
- Wireless devices are not user serviceable. Do not modify them in any way. Modification to a wireless device will void the authorization to use it. Please contact the manufacturer for service.
- Only use drivers approved for country in which the device will be used. See the manufacturer System Restoration Kit, or contact the manufacturer's technical support for additional information.

## United States of America

### USA and Canada Safety Requirements and Notices

Do not touch or move antenna while the unit is transmitting or receiving.

Do not hold any component containing the radio such that the antenna is very close to touching any exposed parts of the body, especially the face or eyes, while transmitting.

Do not operate the radio or attempt to transmit data unless the antenna is connected; if not, the radio may be damaged.

#### Use in specific environments:

The use of wireless devices in hazardous locations is limited by the constraints posed by the safety directors of such environments.

The use of wireless devices on airplanes is governed by the Federal Aviation Administration (FAA).

The use of wireless devices in hospitals is restricted to the limits set forth by each hospital.

### **Explosive Device Proximity Warning**

Do not operate a portable transmitter (such as a wireless network device) near unshielded blasting caps or in an explosive environment unless the device has been modified to be qualified for such use.

### **Use On Aircraft Caution**

Regulations of the FCC and FAA prohibit airborne operation of radio-frequency wireless devices because their signals could interfere with critical aircraft instruments.

The Part 15 radio device operates on a non-interference basis with other devices operating at this frequency. Any changes or modification to said product not expressly approved by Intel could void the user's authority to operate this device.

### **Unintentional emitter per FCC Part 15**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### **Other wireless devices**

#### **Safety notices for other devices in the wireless network:**

Refer to the documentation supplied with wireless Ethernet adapters or other devices in the wireless network.

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause harmful interference. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet helpful: "Something About Interference."

This is available at FCC local regional offices. Our company is not responsible for any radio or television interference caused by unauthorized modifications of this equipment or the substitution or attachment of connecting cables and equipment other than those specified by our company. The correction will be the responsibility of the user. Use only shielded data cables with this system.

## Intentional emitter per FCC Part 15

(If fitted with 2.4 G band or 5 G band)

Low power, Radio LAN type devices (radio frequency (RF) wireless communication devices), operating in the 2.4 GHz/5 GHz Band, may be present (embedded) in the notebook system. This section is only applicable if these devices are present. Refer to the system label to verify the presence of wireless devices.

Wireless devices that may be in the system are only qualified for use in the United States of America if an FCC ID number is on the system label.

This device is restricted to indoor use due to its operation in the 5.15 to 5.25 GHz frequency range. FCC requires this product to be used indoors for the frequency range 5.15 to 5.25 GHz to reduce the potential for harmful interference to co-channel Mobile Satellite systems. High power radars are allocated as primary users of the 5.25 to 5.35 GHz and 5.65 to 5.85 GHz bands. These radar stations can cause interference with and/or damage this device.

Operation of this device is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

Wireless devices are not user serviceable. Do not modify them in any way.

Modification to a wireless device will void the authorization to use it. Contact manufacturer for service.

## Health and safety information

### Exposure to Radio Frequency (RF) Signals Certification Information

This product can contain an embedded radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. government. These FCC exposure limits are derived from the recommendations of two expert organizations, the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.

Before a new model is available for sale to the public, it must be certified to the FCC that it does not exceed the exposure limit established by the FCC. Evaluation per each model is performed in positions and locations (e.g. at the bottom on the body) as required by the FCC.

For body worn operation, this model meets the FCC RF exposure guidelines when used with Samsung accessory designated for this product. Non-compliance with the above restrictions may result in violation of FCC RF exposure guidelines.

RF exposure or SAR information can viewed on-line at <http://www.fcc.gov/oet/ea/fccid/>. This site uses this product FCC ID number on the outside of the product. Sometimes it may be necessary to remove the battery pack to find number. Once you have the FCC ID number for a particular product, follow the instructions on the website and it should provide RF exposure information or values for typical or maximum SAR for particular product.

For corresponding model only

The Specific Absorption Rate (SAR) is a measure of the rate of absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC wireless devices to comply with a safety limit of 1.6 watts per kilogram (1.6W/kg).

SAR level of this device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

## Canada

### **Unintentional emitter per ICES-003**

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the radio interference regulations of Industry Canada.

### **Intentional emitter per RSS 210**

This device complies with RSS 210 of Industry Canada. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.

The term “IC” before the equipment certification number only signifies that the Industry Canada technical specifications were met. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (EIRP) is not more than that required for successful communication. To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

(If fitted with 2.4G band or 5G band)

Low power, Radio LAN type devices (radio frequency (RF) wireless communication devices), operating in the 2.4GHz/5GHz Band, may be present (embedded) in your notebook system. This section is only applicable if these devices are present. Refer to the system label to verify the presence of wireless devices.

Wireless devices that may be in your system are only qualified for use in Canada if an Industry Canada ID number is on the system label.

When using IEEE 802.11a wireless LAN, this product is restricted to indoor use due to its operation in the 5.15 to 5.25 GHz frequency range. Industry Canada requires this product to be used indoors for the frequency range of 5.15 GHz to 5.25 GHz to reduce the potential for harmful interference to co-channel mobile satellite systems. High power radar is allocated as the primary user of the 5.25 to 5.35 GHz and 5.65 to 5.85 GHz bands. These radar stations can cause interference with and/or damage to this device.

The maximum allowed antenna gain for use with this device is 6dBi in order to comply with the E.I.R.P limit for the 5.25 to 5.35 and 5.725 to 5.85 GHz frequency range in point-to-point operation.

The power output of the wireless device (or devices), which may be embedded in your notebook, is well below the RF exposure limits as set by Industry Canada.

Operation of this device is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

Wireless devices are not user serviceable. Do not modify them in any way. Modification to a wireless device will void the authorization to use it. Contact manufacturer for service.

## Brazil

Este produto está homologado pela ANATEL, de acordo com os procedimentos regulamentados pela Resolução 242/2000, e atende aos requisitos técnicos aplicados.

Este equipamento opera em caráter secundário, isto é, não tem direito a proteção contra interferência prejudicial, mesmo de estações do mesmo tipo, e não pode causar interferência a sistemas operando em caráter primário.

## European Union

### European Union CE marking and compliance notices

Products intended for sale within the European Union are marked with the Conformité Européene (CE) Marking, which indicates compliance with the applicable Directives and European standards and amendments identified below. This equipment also carries the Class 2 identifier.

The following information is only applicable to systems labeled with the CE mark .

### European Directives

This Information Technology Equipment has been tested and found to comply with the following European directives:

- EMC Directive 2004/108/EC
- Low Voltage Directive 2006/95/EC
- R&TTE Directive 1999/5/EC

### Samsung Electronics (UK) Ltd, Euro QA Lab.

Blackbushe Business Park Saxony Way, Yateley,  
Hampshire GU46 6GG United Kingdom

### European radio approval information (for products fitted with EU-approved radio devices)

This Product is a Notebook computer; low power, Radio LAN type devices (radio frequency (RF) wireless communication devices), operating in the 2.4GHz/5GHz band, may be present (embedded) in your notebook system which is intended for home or office use. This section is only applicable if these devices are present. Refer to the system label to verify the presence of wireless devices.

Wireless devices that may be in your system are only qualified for use in the European Union or associated areas if a CE mark  with a Notified Body Registration Number and the Alert Symbol is on the system label.

The power output of the wireless device or devices that may be embedded in your notebook is well below the RF exposure limits as set by the European Commission through the R&TTE directive.

The low band 5.15 - 5.35 GHz is for indoor use only.

See 802.11b and 802.11g restrictions for specific countries or regions within countries under the heading "European Economic Area Restrictions" below.

## EU R&amp;TTE compliance statements

Nation	Description
 <b>Česky[Czech]</b>	Samsung tímto prohlašuje, že tento Notebook PC je ve shodě se základními požadavky a dalšími příslušnými ustanoveními směrnice 1999/5/ES.
 <b>Dansk[Danish]</b>	Undertegnede Samsung erklærer herved, at følgende udstyr Notebook PC overholder de væsentlige krav og øvrige relevante krav i direktiv 1999/5/EF.

Yen Phong 1, I.P Yen Trung Commune, Yen Phong Dist., Bac Ninh

### Province, Vietnam

For the web or the phone number of the Samsung Service Center, see the Warranty or contact the retailer where you purchased your product.

### European economic area restrictions

#### Local restriction of 802.11b/802.11g radio usage

Note to integrator: The following statements on local restrictions must be published in all end-user documentation provided with the system or product incorporating the wireless product.

Due to the fact that the frequencies used by 802.11b/802.11g wireless LAN devices may not yet be harmonized in all countries, 802.11b/802.11g products are designed for use only in specific countries or regions, and are not allowed to be operated in countries or regions other than those of designated use.

As a user of these products, you are responsible for ensuring that the products are used only in the countries or regions for which they were intended and for verifying that they are configured with the correct selection of frequency and channel for the country or region of use. Any deviation from permissible settings and restrictions in the country or region of use could be an infringement of local law and may be punished as such.

The European variant is intended for use throughout the European Economic Area. However, authorization for use is further restricted in particular countries or regions within countries, as follows:

### **General**

European standards dictate maximum radiated transmit power of 100 mW effective isotropic radiated power (EIRP) and the frequency range 2400 – 2483.5 MHz.

The low band 5.15 - 5.35 GHz is for indoor use only.

### **Belgium**

For private use outdoors in public spaces, no registration is necessary for distances less than 300 m. For distances greater than 300 m, you must register with the Belgian Institute for Postal services and Telecommunications (BIPT). For commercial use outdoors, you must obtain a license from the BIPT. For registration or licensing, please contact the BIPT.

For other languages, refer to the corresponding manuals.

### **France**

The low band 5.15 - 5.35 GHz is for indoor use only.

## RTC caution

**CAUTION :** Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the Manufacturer's instruction.

## WEEE symbol information

**Correct disposal of this product (Waste Electrical & Electronic Equipment)**

**(Applicable in countries with separate collection systems)**

This marking on the product, accessories or literature indicates that the product and its electronic accessories (for example, charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.

## India only

For more information on safe disposal and recycling visit our website [www.samsung.com/in](http://www.samsung.com/in) or contact our Helpline numbers - 18002668282, 180030008282.

This product is RoHS compliant.

**Correct disposal of batteries in this product**  
**(Applicable in countries with separate collection systems)**

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material re-use, please separate batteries from other types of waste and recycle them through your local, free battery return system.

## USA only

This Perchlorate warning applies only to primary CR (Manganese Dioxide) Lithium coin cells in the product sold or distributed ONLY in California USA.

"Perchlorate Material- special handling may apply, see [www.dtsc.ca.gov/hazardouswaste/perchlorate](http://www.dtsc.ca.gov/hazardouswaste/perchlorate)."

Dispose unwanted electronics through an approved recycler.
